WHY ANALYZE THE GOOGLE PLAY STORE?

Mobile App Market
is set to grow 20%
by 2023

Android Apps
comprise 90% of the
Mobile App Market

What makes an App
popular? Can we predict
how popular it's going to
be?

What are some
interesting patterns in
user behavior related to
app usage & feedback?

Introduction

- Android is the most popular operating system in the world, with over 2.5 billion active users spanning over 190 countries.
 - Google Play was launched on March 6, 2012, bringing together Android Market marking a shift in Google's digital distribution strategy .
 - Android is the dominant mobile operating system today more than 85% of all mobile devices running Google's OS. The Google Play Store is the largest and most popular Android app store.
 - There are more than 3.04 million apps found on Google Play Store.
 - The Play Store apps data has enormous potential to drive app-making businesses to success.
 - Actionable insights can be drawn for developers to work on and capture the Android market. The main goal of our project is-
- 1) The purpose of our project is to gather and analyze detailed information on apps in the Google Play Store in order to provide insights on app features and the current state of the Android app market.
 - 2) The Objective of the project to Explore and analyze the data to discover key factors responsible for app engagement and success.

Problem Statement

Problem Statement

- ❑ Two datasets are provided, one with **basic information** and the other with **user reviews** for the respective app.
- ❑ We must examine and evaluate the data in both datasets in order to identify the important characteristics that influence app engagement and success.

So, what factors influence an app's success?

An app is said to be successful if it has:

- ❑ A high average user rating
- ❑ A good number of positive reviews
- ❑ A good number of monthly average users
- ❑ High revenue per customer and so on.

Problem Statement

- ☐ Which are Top categories on Google Play store?
- ☐ Which category of Content is found more?
- ☐ Distribution of the ratings of the apps?
- ☐ What percentage of apps are Free and Paid?
- ☐ Which category of apps has the greatest number of installs?
- ☐ What are the Top 10 installed apps in different categories?
- ☐ Which are the top expensive Apps?
- ☐ Which are the Apps with the highest number of reviews?
- ☐ Count of Apps found in different genres?
- ☐ Which are the apps that have made the highest-earning?
- ☐

Dataset Preparation

- **Loading the data sets:** Two datasets, First Play store app dataset and User Reviews dataset.
- **Import Libraries:** NumPy, Pandas, Seaborn and Matplotlib
- **Data cleaning:** Null values, Finding and removing Outliers, Removing duplicate data.
- **Data Imputation:** Filling the missing categorical values with mode and numerical values with median. Conversion of price, installs, reviews into numerical values.
- **Exploratory Data Analysis:** Analyzing the data sets to summarize their main characteristics using statistical graphics and data visualizations method.

Attributes in Google Play store Data

- 1.App :** This column Contains the name of the app for each observation.
- 2.Category :** This column Contains Category to which the app belongs.
- 3.Rating :** This column contains the average rating for the app.
- 4.Reviews :** This column contains the number of reviews that the app has received on the play store.
- 5.Size :** This column contains the amount of memory the app occupies on the device.
- 6.Installs :** This column contains the number of times that the app has been downloaded and installed from the play store.
- 7.Type :** This column contains the information whether the app is free or paid.
- 8.Price:** If the app is a paid app, this column contains the data about its price.
- 9.Content Rating:** This column contains the maturity rating of the app i.e. the age group of the audience for which it is suitable.
- 10.Genres:** This column contains the data about to which genre the app belongs. Genres can be considered as a further division of the group of Category.
- 11.Last Updated:** Contains the date on which the latest update of the app was released.
- 12.Current Version:** Contains information on the current version of the app available on the play store.
- 13.Android Version:** Contains information about the android versions on which the app is supported.

Attributes in User reviews

1. **App**- Application name
2. **Translated Review**- User review
3. **Sentiment**- Positive/Negative/Neutral
4. **Sentiment Polarity**- Sentiment polarity score
5. **Sentiment Subjectivity**- Sentiment subjectivity score

OVERVIEW OF ANALYSIS

Data Cleaning

Understand the structure of the dataset and clean data before analysis

Data Exploration

Uncover initial patterns, characteristics, and points of interest using visual exploration

Predictive Modeling

Formulate a statistical model to forecast an outcome using relevant predictors

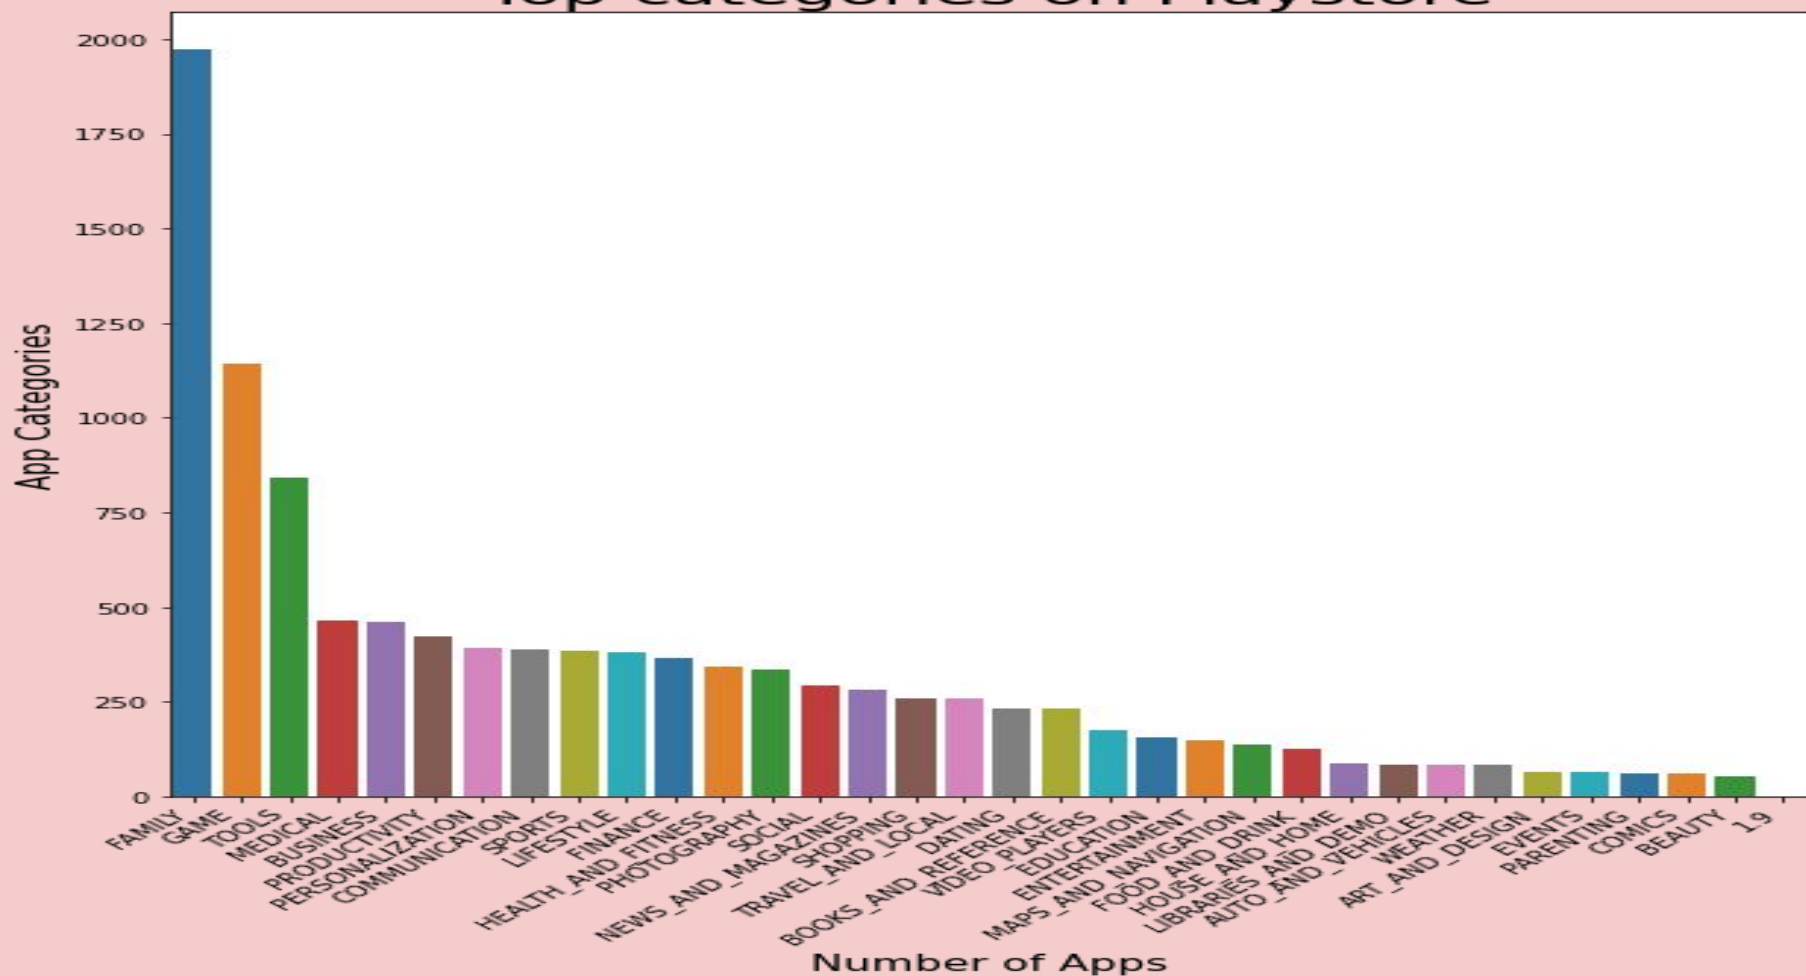

Percentage of Paid apps v/s Free apps

We Observed that **92.20% of Apps are free** and only **7.80% of Apps are paid** in Play store.

Percent of Free Vs Paid Apps in store

Top categories on Playstore

Percentage of apps belonging to each category in the playstore

category Apps which are having most number of installs

Average rating of apps in Playstore

Top 10 Installed Apps

Categories in which the top 20 free apps belong

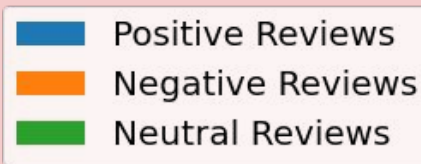

Category in which the top 10 paid app belong

Percentage of Review Sentiments

Positive Reviews

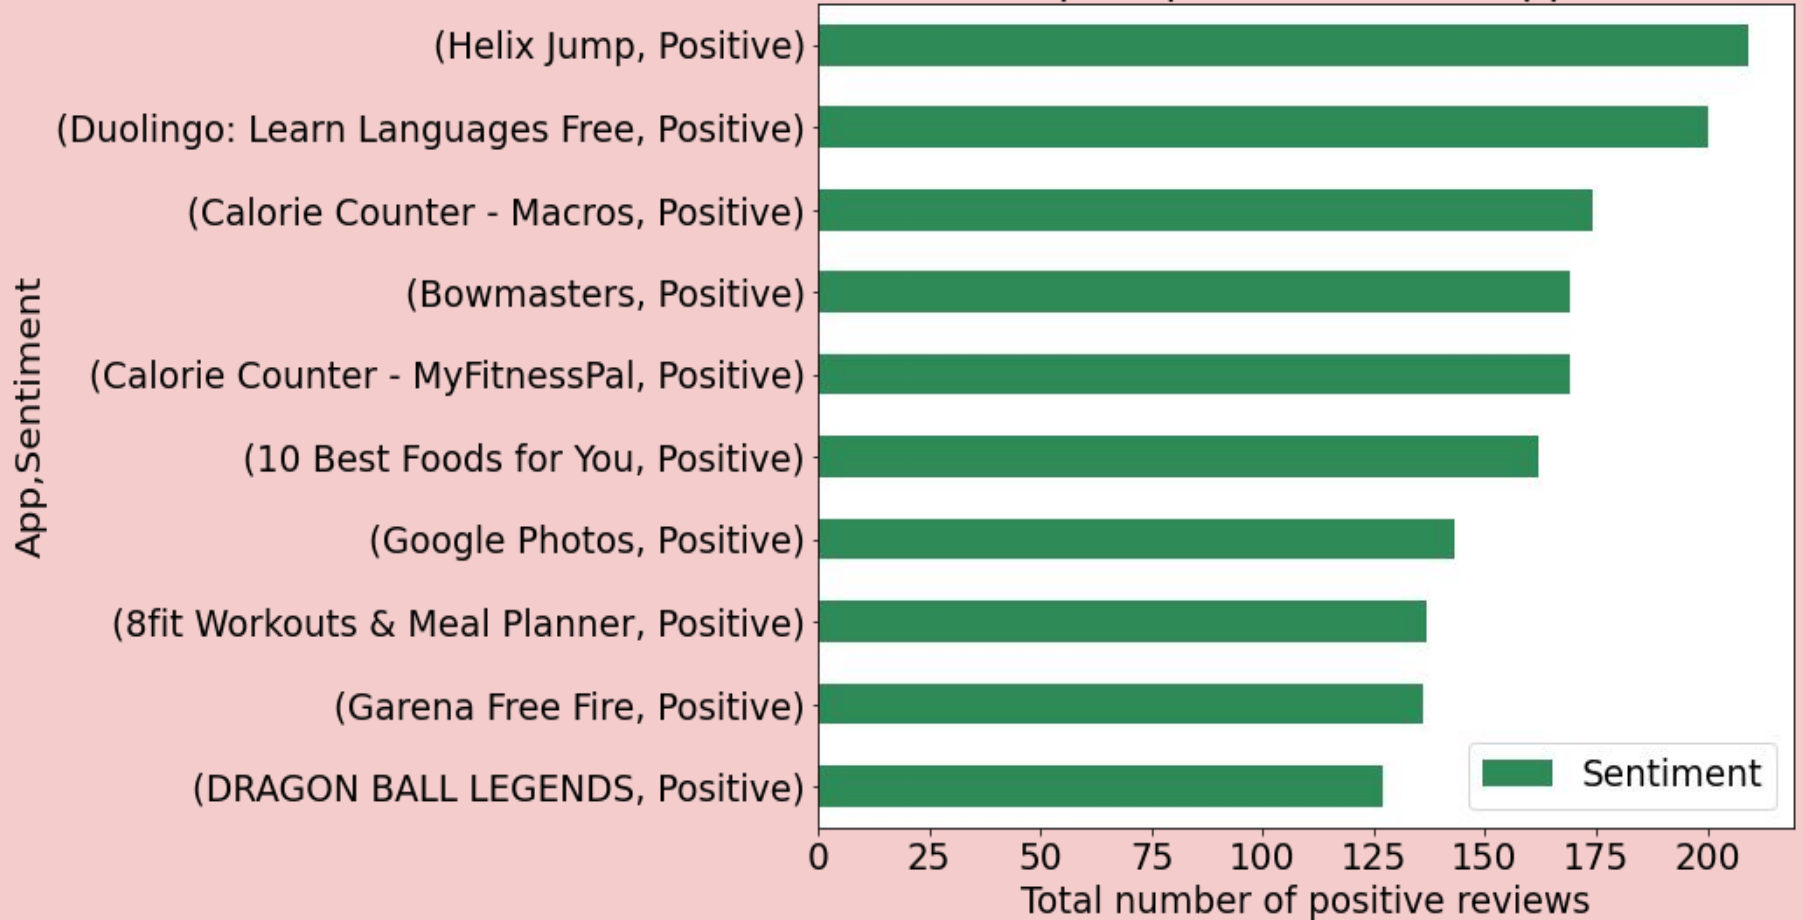

Negative Reviews

Neutral Reviews

The number of **Unique** Apps from Play store and User reviews merged dataset are **816**.

From Sentiment column, **64%** are **Positive**, **22%** are **Negative** and **14%** are **Neutral** values.

Top 10 positive review apps

Top 10 negative review apps

Challenges Faced

- ❑ Reading the dataset and comprehending the problem statement.
- ❑ Examining the business KPIs for app development and devising a solution to the problem.
- ❑ Handling the error, duplicate and NaN values in the dataset.
- ❑ Designing multiple visualizations to summarize the information in the dataset and successfully communicate the results and trends to the reader.

Conclusion's

92.19% apps are **Free** and 7.81% apps are paid in type.

81.80% apps have **Everyone** content rating.

Events category has a **highest mean rating of 4.39** and Dating category has lowest 4.05 rating.

Family, Game and Tools are **top three** categories having 1906, 926 and 829 app count.

Most competitive category: **Family**

Category with the highest number of installs: **Game**

Tools, Entertainment, Education, Business and Medical are top Genres.

8783 Apps are having size less than or equal to **50 MB**.

7749 Apps has rating **more than 4.0** including both type of app.

Overall sentiment count of merged dataset in which **Positive sentiment count is 64%, Negative 22% and Neutral 14%.**

A red pushpin is pinned to the top center of a yellow sticky note.

THANK
YOU
